In another triumph for the distant RA (in Finland) and his local stand-in weather prophet, the day dawned miraculously bright and girtiferously sparkly and there was great excitement at the camp as **DUI** nervously contemplated his virginal run-setting task with the benign guidance of **Sniffer Dog** and the geodesic brilliance of the peripatetic but recently rehomed **KanDoo**.

At or about the appointed time most people intending to waddle – even **Gobbles** and **CountHerFeet** - had turned up at the correctly advised caravan park which is a different one from which **Mighty** had set runs but this did not deter **Lost Rooster** from putting on his navigation system to “last van park run” setting and finding no one there. (See further: Charges, below) Only a short pause...while the small but well-formed and FAQ pack mustered on the cabinstead porch to listen to early instalments on the paracircumnavigation of the continent that coincidentally included a visit to Freo Nash hash by our hosts.

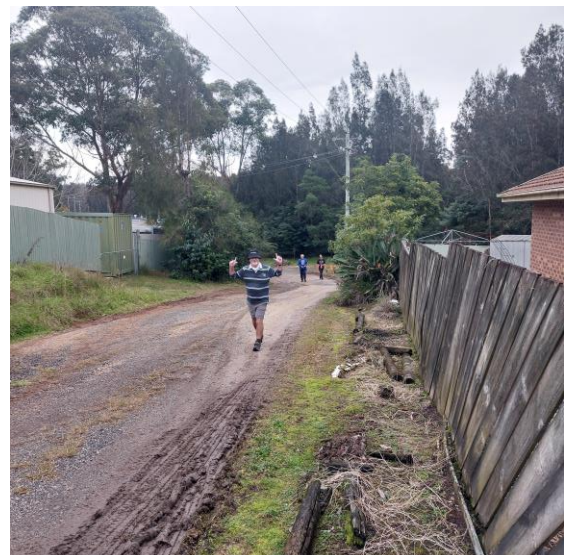

Chalk talk was brief: “Umm, some marks, a couple of arrows and there is a drink stop” (See further: Charges, below) The pack (or bits of it) listened intently. (Caravan park – tent – geddit?)

Then with very little further ado the hair pointed vaguely to some direction that might prove

Trash Volume: do not disturb neighbours

profitable for anyone looking for a starting point and they were off! **FishFinger** showing no signs of previous dicky knee or advancing age, tore out to the front along a path past some cabins and led the pack on a merry perambulation around every bloody tuck and turn in the van park, past the new **KanDoo** domicile and eventually out onto Beach Road, where by now **Rooster Booster** also setting a brisk run up near the front and following the R trail to the West while the walkers led by the sprightly and newly shod (undetected and unadmitted 🤔) **Two Fathers** was pacing it out briskly at a rapid waddle towards the East and the traffic lights by which time the runners had resumed the FRB position. Up past the school, round the bike park and further up GBD to the new roundabout then across through some shiggy and up a vague track to eyedunno where and **HeadShot** somewhere closer to the front than the back

as the pack meandered on through some of the more mozzie infested parts of Lower Batehaven before attacking a vertiginous haul up to Crag Road and popping out somewhere on Beach Road

and lurching in the general direction of the

for which there were at least five bloody markers before the pack percolated to the pictureskew patch posing as a lookout and descending on the goodies

or posing for the camera at great personal risk but some sangfroid.

Or just taking in the view

Before, having slopped up some sustenance, the pack wandered off in the general direction of the Rotary Staircase and down onto the beach where they plodded (and chatted) into the gathering gloom,

possibly muttering get lost or go home before finally, a pointer to the circle

where there were charges.

- **FishFinger** gave a comprehensive run report and awarded 0.34
- **Rooster Booster** was charged for failed recruitment of new members at the drink stop. (I think it made sense to CHF)
- **KanDoo** was charged with commercial incompetence for forgetting to advise the world of his sale of valuable remnants of his former location.
- **Lost Rooster** was charged for use of auto pilot instead of reading the Trash for directions.
- **LGS** paid the price for short cutting (about 600km) on El Camino. Thanks **Headshot**.

- **DUI** was advised that **Gobbles** would never have advised him that the bucket provided drinks at the drink stop. NEVER!!!!
- **ANNOUNCEMENT**: Botany Bay H3 2000th run 27 July in Sydney somewhere. Sniffer has details.
- And there were a couple birthdays before the anthem and the adjournment.

Enap em tasol.
